Seminar : From Kai Tak to Chek Lap Kok – The Construction and Historical Development of Hong Kong International Airport

After the last flight took off from Kai Tak Airport in the early morning of 6 July 1998, an airfield ground lights-off ceremony was held at the Air Traffic Control Tower to mark the end of over 70 years of historic mission of Kai Tak Airport. In the coming year, it will be 20th anniversary of Hong Kong International Airport in 2018. An aviation history and development seminar will be provided to recall your unforgettable memories in Kai Tak and update the development of CLK.

Speaker : Ir James Ng

Ir James Ng is a Chartered Electrical Engineer since 1998. He was an engineer working at CLP Power prior to joining the Airport Authority when Chek Lap Kok Airport opened in 1998. Since then, he has been with the Hong Kong International Airport for 20 years. He is well-known as an experienced aviation enthusiast and collector of industry memorabilia. He has authored five books on Hong Kong aviation history. Among these is "125 Years of Aviation History in Hong Kong", which has been included in the 'Best Book Award' in the second Hong Kong Golden Book Awards in 2015.
