## **Technical Webinar**

### **Digitalize Electrification –**

### **The Revolution of Low Voltage Industry**

Thanks to Hong Kong's electricity and infrastructure providers, Hong Kong enjoys an extremely reliable energy supply that excels in many top cities over the world. Despite the provision of such a highly reliable energy supply, there is a growing call to innovate for a greener and smarter energy.

The low voltage industry, as a critical component to electrical system, is still yet to transform. This seminar will focus on how the traditional electrical devices transform to IoT /Cloud computing century. The session will cover the revolution and development of low voltage components, adaptability of IoT technologies, applications of cloud computation, the open standard and cyber security conformance, as well as the future trend of intelligent operations.

### **Speaker: Mr. Keith Wong**

Mr. Wong is the Head of Digital Business in Siemens HK & Macao's Smart Infrastructure Division and the Deputy Head of Smart Technology Development Specialist Group in Society of Operations Engineers (HK Region). Over 13 years of experience, he has

acquired a comprehensive pool of knowledge in power transmission & distribution, control & automation, energy management and low voltage industries. Mr. Wong is recently leading the team in digital implementations, including Reliability Centered Asset Management for asset health calculation and residual life estimation.
